

Lock Area School

Site Improvement Plan 2017

Values

- *Respect*
- *Responsibility*
- *Caring*
- *Fairness*

Mission

Our students will be successful in literacy and numeracy and use effective learning strategies to become informed citizens who contribute positively to communities.

Site Improvement Priorities

Priority 1 – Numeracy: developing the problem solving skills of students

Priority 2 – Developing our students as 21st Century Learners

Understandings that underpin these priorities

- *Learning is enhanced when the curriculum is differentiated, providing multiple entry points and a variety of learning options, to meet the individual needs of students.*
- *Students will be successful learners when provided with 21st Century learning opportunities through a curriculum that is innovative, challenging, rigorous and relevant to their life experiences and connected to their world beyond school.*
- *Learning is enhanced when students are provided with a variety of processes that actively engage them in deep creative and critical thinking, skill development and problem solving. Our site data tells us this is an area worth improving.*
- *Learning is strengthened when students form positive relationships with peers, staff, families and the wider community.*
